

Hey there! I'm an Industrial Designer with experience leading end-to-end design of commercial peripherals, with skills in ergonomic research, CMF strategy, rapid concept ideation, and cross-functional execution from concept through engineering hand-off. As a designer, I find myself blending strategic exploration with hands-on prototyping, iterative refinement, and user-centric testing, finding this to be my strength.

Experience

Dell Technologies | Industrial Designer

Aug 2023 — Present (2 years 3 months)

- Led design direction for next-generation keyboard & mouse combos and cables & dongles portfolio, establishing design language continuity across.
- Conducted extensive ergonomic studies: hand anthropometrics, keycap dish profiling, palm-rest geometry, and stretch reach analysis to optimize comfort and typing efficiency.
- Partnered closely with engineering, UX, wireless firmware, acoustics, marketing, and business teams to define product specs, technology features, and roadmap improvements vs previous generations.
- Worked directly with suppliers and mechanical engineers to ensure CAD accuracy, tooling feasibility, and CMF fidelity; guided design intent through build cycles.
- Rapidly iterated through sketching, CAD form exploration, foam models, and early mock-ups for tactile validation and ergonomic evaluation.
- Conducted competitive teardown & benchmarked usability, affordances, and interaction clarity to inform industrial form, port orientation, and device language.
- Produced high-fidelity renders, build reviews, and design CMF packs to align cross-functional teams around product intent and launch quality.

Dell Technologies | Industrial Design Intern

Jul 2021 — Dec 2021 (6 months)

- Conducted user testing and 1:1 interviews for evaluations, constantly iterating form factor based on physical and psychological preferences. Produced an experience video prototype to secure stakeholder buy-in before final design
- Researched Gen Z consumer trends and pandemic-era behaviors, proposing a Dell rental service model with option-to-purchase. Designed a hybrid retail/workspace concept enabling consumers to try Dell devices in-store, bridging B2B strengths with consumer engagement

Grab | Product Design Intern

Jul 2022 — Jun 2023 (1 year)

- Redesigned verification flow with guerrilla research & prototype testing; results validated via rollout, reducing completion time to <30 seconds.
- Designed security analyst dashboard workflows; consolidated tasks to one-screen efficiency, reducing user steps & time.

Aum Active | Freelance Designer

Feb 2022 — May 2022 (3 months)

- Designed a user-friendly instruction manual for Aum Active's aerial product collection by observing real users, mapping first-timer pain points, and creating clear, accessible illustration-based guides
- Applied branding guidelines and visual hierarchy principles in Adobe InDesign, iterating through multiple client feedback rounds to achieve clarity and alignment with brand identity

Education

National University of Singapore Bachelor of Arts (Industrial Design)

Aug 2020 — May 2023

Temasek Polytechnic Diploma in Product & Industrial Design

Apr 2017 — Mar 2020

Temasek Polytechnic Polytechnic Foundation Programme (Design)

Apr 2016 — Apr 2017

Skills

Designing

Sketching, CMF, CAD, rapid form iteration, 3D Rendering, Foam Models, 3D Prints, Ergonomic Rigs

UX & Research

User Flows, Wireframing, Prototyping, Usability Testing, Human-Centered Design, Interaction Design, Information Architecture, Accessibility (WCAG)

Tools & Technical

Keyshot, CREO, Rhino, Figma, Adobe Suite (Ps, Ai, Id, Ae, Pr)

Recognition

2020

Lee Kong Chian Award
XNERGY Design Course Silver Medal
Temasek Polytechnic-StudioNorm
Design Consultants Skills Mastery Award

2018

IKEA Young Designer Awards 2018
People's Choice Award (IKEA)
